

Homework 7

Due Wednesday, April 16

1. (10 pts.) Decompose each of the following into a sum of tensors transforming as irreps of $SU(3)$:
 - (a) The product in Problem 10.A of the textbook (u^i transforms as a 3).
 - (b) $u^{ij}v_k$, where u^{ij} is a 6, and v_k is a $\bar{3}$.

Dimensions of the irreps are given by eq. (10.43) of the textbook.

2. (10 pts.) Problem 10.B of the textbook.
